

GPLUS2 have helped us to deliver a couple of projects for customers including a Joomla! based website.

They were able to take work with our Photoshop designs, first creating working models and then Joomla! templates. As a result, we were able to meet deliverable timescales / budgets and have a satisfied customer.

Despite the physical distance between us, communications were simple, and there was a clear understanding of the requirements from onset.

We are hoping to engage with GPLUS2 on future projects and would recommend their work.
